PROFESSIONAL SUMMARY

A highly accomplished Frontend Architect and UI specialist with **10+ years of hands-on experience** building performant, scalable, and visually engaging web applications for enterprise clients and SaaS products. Expertise spans the full frontend stack — from pixel-perfect HTML/CSS theming and responsive layout design to component-driven React and Vue architectures integrated with headless CMS backends (Drupal). Currently leveraging **AI-assisted development workflows** — including GitHub Copilot, Claude AI, ChatGPT, and Cursor — to accelerate Figma-to-code delivery, refactor legacy codebases, and improve team velocity. Recognised for cross-functional collaboration, strong attention to detail, and consistently delivering production-ready UI under tight deadlines.

KEY HIGHLIGHTS

- 10+ years of professional frontend development across agencies, startups, and enterprise clients.
- Proficient in React JS, Vue 3 / Nuxt, Angular 8, and vanilla JS — with a strong foundation in semantic HTML5 & CSS3.
- Experienced in headless CMS architectures using Drupal, REST API integration, and Next.js App Router patterns.
- AI-powered development using GitHub Copilot, Claude AI, ChatGPT, and Cursor for faster Figma-to-code delivery.
- Proven track record in website performance optimisation, achieving measurable improvements in Core Web Vitals.
- Skilled in Bootstrap 5 and Tailwind CSS for rapid, responsive UI development.
- Strong experience with Git-based version control workflows (GitHub, Bitbucket, SVN) in team environments.
- Background in graphic design (Adobe Photoshop, InDesign) enhances UI/UX sensibility and design collaboration.

TECHNICAL SKILLS

Core Frontend	HTML5, CSS3, JavaScript (ES6+), jQuery, Semantic Markup, Responsive Design
Frameworks	React JS, Vue JS (Vue 3, Nuxt), Angular 8, Next.js (App Router)
Styling	Bootstrap 5, Tailwind CSS, CSS Modules, SASS/SCSS, Google AMP
AI Tools	GitHub Copilot, Claude AI, ChatGPT, Cursor — used for code generation, refactoring & Figma-to-code workflows
CMS / Backend	Drupal (Headless), REST API integration, JSON:API
Backend (Basic)	Python, MySQL
Performance	Core Web Vitals, Lighthouse, lazy loading, code splitting, image optimisation, SEO
Version Control	Git, GitHub, Bitbucket, SVN, branch strategies, PR reviews
Tools & IDEs	VS Code, Chrome DevTools, Adobe Photoshop, InDesign, Figma (read/handoff)

Soft Skills

Team Leadership, Project Management, Time Management, Critical Thinking, Client Communication

PROFESSIONAL EXPERIENCE

Webspiders Pvt. Ltd — Front-end Developer

Mar 2015 – Present (10+ Years)

- Led end-to-end frontend development for multiple enterprise and SaaS product websites — from initial architecture planning to production deployment.
- Converted complex UX/Figma designs into modular, reusable React and Vue components, integrating AI tools (GitHub Copilot, Cursor, Claude AI) to accelerate delivery.
- Built and maintained headless Drupal + React/Next.js frontends, consuming REST/JSON:API endpoints with server-side rendering and dynamic routing.
- Drove website performance improvements — reduced page load times, improved Lighthouse scores, and enhanced Core Web Vitals across multiple projects.
- Implemented SEO best practices including semantic HTML, structured metadata, Open Graph tags, and server-side rendering strategies.
- Mentored junior developers on frontend best practices, component architecture, and code quality standards.
- Collaborated closely with UX designers, backend engineers, and product managers to deliver pixel-perfect, cross-browser-compatible interfaces.
- Managed codebase versioning using GitHub and Bitbucket with structured branching strategies and code review processes.

Budli.in — HTML Developer

Sep 2014 – Feb 2015 (6 Months)

- Designed and developed high-converting, mobile-optimised landing pages for digital marketing and PPC campaigns.
- Collaborated with marketing teams to translate campaign briefs into engaging frontend experiences that improved click-through and conversion rates.
- Managed and enhanced the company's e-commerce website, improving product page UX, navigation flow, and checkout experience.
- Diagnosed and resolved frontend bugs, cross-browser issues, and performance bottlenecks to ensure website stability.

Delgence — HTML Developer

Apr 2012 – Sep 2014 (2.5 Years)

- Developed and maintained multiple client websites with a strong focus on user-centric design and frontend performance.
- Implemented responsive design techniques ensuring consistent, high-quality experiences across desktop, tablet, and mobile devices.
- Applied modern CSS methodologies and JavaScript interactions to create engaging, intuitive user interfaces.
- Collaborated closely with the design team to faithfully translate visual designs into functional, accessible web pages.
- Regularly conducted cross-browser testing and accessibility audits to maintain quality standards.

AD India — Graphic Designer

May 2010 – Jan 2012 (1.5 Years)

- Designed a broad range of print and digital marketing collateral including brochures, leaflets, business cards, book covers, and promotional banners.
- Developed brand identity materials aligned with client briefs, working to tight deadlines with strong attention to typographic and layout detail.
- Built a solid design foundation in visual hierarchy, colour theory, and composition — skills that directly enhance UI development and design collaboration today.

SELECTED PROJECTS

1. IPI Singapore (Latest – 2024/25)

URL: <https://www.ipi-singapore.org/>

Stack: React JS, Next.js (App Router), Drupal (Headless CMS), Tailwind CSS, TanStack Query

Design: Provided by in-house UX designer; delivered as Figma handoff.

Responsibilities: Architected and developed the entire frontend of the IPI Singapore innovation portal using React JS and Next.js App Router. Built reusable component libraries consuming Drupal JSON:API endpoints via TanStack Query. Delivered key features including infinite scroll listings, GSAP animations, tech offer/need pages, innovation challenge pages, impact stories, podcasts, careers, sustainability hub, and SEO metadata generation. Collaborated with backend and design teams across UAT and production environments.

2. SpiderX.ai

URL: <https://www.spiderx.ai/>

Stack: HTML5, Bootstrap 5, CSS3, jQuery, Custom JS, Drupal

Design: Designed by in-house UX designer.

Responsibilities: Led complete HTML theming for the SpiderX.ai Generative AI Voice Agents platform. Implemented all jQuery interactions, custom animations, and responsive layout components. Ensured pixel-perfect delivery from Figma designs across devices and browsers.

3. PeerlessOne.in

URL: <https://www.peerlessone.in/>

Stack: Vue JS (Vue 3, Nuxt), Bootstrap 5, CSS3, jQuery, Drupal

Design: Designed by in-house UX designer.

Responsibilities: Developed the full frontend UI in Vue/Nuxt integrated with a Drupal CMS backend. Responsible for all page templates, component development, API integration, and responsive styling — excluding the game and quiz modules handled by a separate team.

4. SGInnovate.com

URL: <https://www.sginnovate.com/>

Stack: HTML5, Bootstrap 5, CSS3, jQuery, Drupal

Design: Designed by in-house UX designer.

Responsibilities: Implemented responsive frontend UI and interactive elements for the SGInnovate platform. Developed custom jQuery interactions, animated sections, and ensured cross-browser compatibility throughout.

5. Affinidi.com

URL: <https://www.affinidi.com/>

Stack: React JS, Drupal

Design: Designed by in-house UX designer.

Responsibilities: Built React-based frontend components integrated with a Drupal CMS backend. Focused on component reusability, clean state management, and seamless API data rendering.

CERTIFICATIONS

◆ Web Design

Fundamentals of responsive web design, UI/UX principles, and modern CSS techniques.

◆ Digital Marketing

SEO, SEM, content marketing, and analytics fundamentals — directly applied to frontend SEO delivery.
